12.Q: Seeding a Table with Select Statements I'm trying to seed a table with some data. The data gets transferred via a Visualforce page and a JS Block. I'm able to get it to work for the last/first row. I'm trying to add data for other entries that the user can select a row from a picklist and click a button, but it's not coming through. My Controller:

```
public static List getCaseByRowNumber(List rows) {
    System.debug(LoggingLevel.INFO, 'getCaseByRowNumber Starting...');
    List cases = [SELECT Id, Subject, Status, OwnerId FROM Case LIMIT :rows];
    return cases;
} // Executed on first run through the page (without a row number specified)

public void initialize() {
    if (Integer.valueOf(Session.getId()) == 0) {
        insert new Case();
    }
    Case.sObjects.Case.getSOBJECTType().getDescribe().fields.getMap().get('OwnerId').getDescribe().getLabel().equalsIgnoreCase('Sports Marketing') ||
    Case.sObjects.Contact.getSOBJECTType().getDescribe().fields.getMap().get('Contact_Pref_1__c').getDescribe().getLabel().equalsIgnoreCase('Sports Marketing')
    return;
    List rows = [SELECT Id, Subject, Status, OwnerId FROM Case];
    System.debug(LoggingLevel.INFO, 'getCaseByRowNumber Ending...');
```
